***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
  - I. Claims 1-11, drawn to a tomato juice or pastas, classified in class 426, subclass 599.
  - II. Claims 12-23, drawn to a method of making a tomato serum, classified in class 426, subclass 628.
4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special feature linking the two inventions is a tomato paste with 5.5-20% dry residue and 18-70% soluble solids, which does not provide a contribution over the prior art as evidenced by Gallaher et al. (US 5965190). Gallaher et al. (Gallaher) discloses on column 1 lines 34-40, of a tomato paste, which has less than 18% soluble solids (8-24% soluble solids).  
Note: By definition a paste contains 32% soluble solids.
5. Applicant is advised that the reply of this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
